⁴ Unsichere Korrektur. »In the insertion above the line is probably to be recognized the variant found in the cursives 14 and 17 πολλῶ. It may be due to the same hand as the body of the text; whether the σ of ποσσῶ was cancelled or not cannot be certainly determined. But the decipherment is doubtful, the first supposed λ being of a curiously rounded shape.« (B. P. Grenfell/ A. S. Hunt VII 1911: 13 Anm. 7).
